Pork and Sweet Potato 38% / 4.0%

Organic 28% / 4.0%

Canned Food All Flavors 2.0% / 1.5%

All foods listed are dry except when noted by “canned”. Depending on what type of insulin you use these are the foods I would suggest. If you are using Lantus, PZI ect. I would stay with the lower carbs below 12%. If you are using others like NPH ect. I would feed the higher carbs or supplement with some of the other foods if you want to use canned.
